-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Abstract

Applicant is reminded of the proper language and format of an Abstract of the Disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. The printer will no longer accept Abstracts that are more than 25 lines, regardless of the number of words. The form and legal phraseology often used in patent claims, such as "means" and "said", should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

35 USC 112, Second Paragraph

Claims 1 -10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants claims are written with identifiers I, II, III and F1, F2, - F8 etc. which is confusing as to which of the combinations of polymers applicants are referring to as the copolymer.

In addition to the discussion concerning the identifier above, the process merely includes the one general step of "interfacial polymerization". There is no clear indication which moieties are undergoing the interfacial reaction. Although the Examiner may conclude, which moieties applicants are referring by the specification the Examiner may not read limitations into the claims. Note also the lack of parameters, amounts, and process conditions does not eliminate the possibilities of the reaction taking place as homopolymers, I and II, and the resulting in a blend of I and II, the process as described as the resulting polycarbonate product is unclear to applicants intent.

Note that a process should at least recite clear,, active steps and any process parameters necessitated by the specification so that the claim will "clearly set out and circumscribe a particular area with a reasonable degree of precision and particularity, In re Moore, 169 USPQ 236, and make it clear what subject matter the claim

encompasses, as well as make clear the subject matter from others would be precluded. In re Hammack 166 USPQ 204.

***It is noted that without a clear and concise understanding of applicants' invention. A fair and comprehensive search of all potential prior art can not be made. However, a search has been performed and in addition, a structure search will be performed during the waiting period of the response in order to expedite prosecution of the case.**
